

GPTrack for the Craft Beer Industry

GPTrack is a secure, web-based risk management and safety platform designed to ease compliance, improve risk prevention efforts and results, and relieve regulatory pain points. The programs are simple to set up and easily create a comprehensive and cost-effective risk management and safety program.

GPTrack is designed to...

➤ **Save Time**

- Automates reports, such as the OSHA 300 log and First Report of Injury and sends directly to carrier
- Easily tracks certificates of insurance by expiration date; automated system notifies you when they are due
- Electronically schedule and track employee trainings

➤ **Strengthen Compliance and Risk Prevention Efforts**

- Utilize the comprehensive library of safety resources and training materials to create IIPP and return-to-work programs
- Access trending reports to discover root causes and focus your training efforts to eliminate incidents

➤ **Save Money**

- Reduce claims, lower your experience modification, and decrease insurance premiums
- Document your compliance efforts and improve your safety programs, potentially leading to lower rates from carriers and protection against fines and citations
